

OFFICE 365 ANALYSIS TECHNOLOGY
THAT **REVOLUTIONIZES** YOUR DIGITAL
WORKPLACE **PRODUCTIVITY.**

Illuminate the path to unlock your organization's full potential.

CREATE BETTER OPPORTUNITIES FOR EMPLOYEE ENGAGEMENT.

Create an Impressive User Experience

- Ensure continuous productivity with proactive, customizable service monitoring - historical benchmarking automatically detects critical performance deviations before your users do
- Minimize the impact of service interruptions – gain extra time to get your backups in place with the fastest outage alerts on the market
- Smart bot simulations show the actual end-user experience – support the reality, not the myth and keep communication and collaboration flowing in your organization

Reach New Levels of Productivity in Teams

- Discover hidden pools of knowledge with advanced search functionality and visualization of Teams interaction
- Break down adoption roadblocks – target your user engagement weak links geographically, departmentally and individually
- Stimulate productivity and maintain data security – identify and categorize integrated 3rd party apps and stay in the know about guest user activity

Don't Just Manage Office 365 - Improve It!

- Make the best even better – define for yourself what you monitor, the analysis you do, where you display it, and the alerts you receive
- Ensure your Office 365 applications are SLA-compliant at all times
- Enhance the overall manageability of Office 365 in your digital collaboration journey
- Make better decisions faster and more effectively – over and over and over again

OPS ANALYTICS FUNCTIONALITY

Better Understanding for Better Engagement

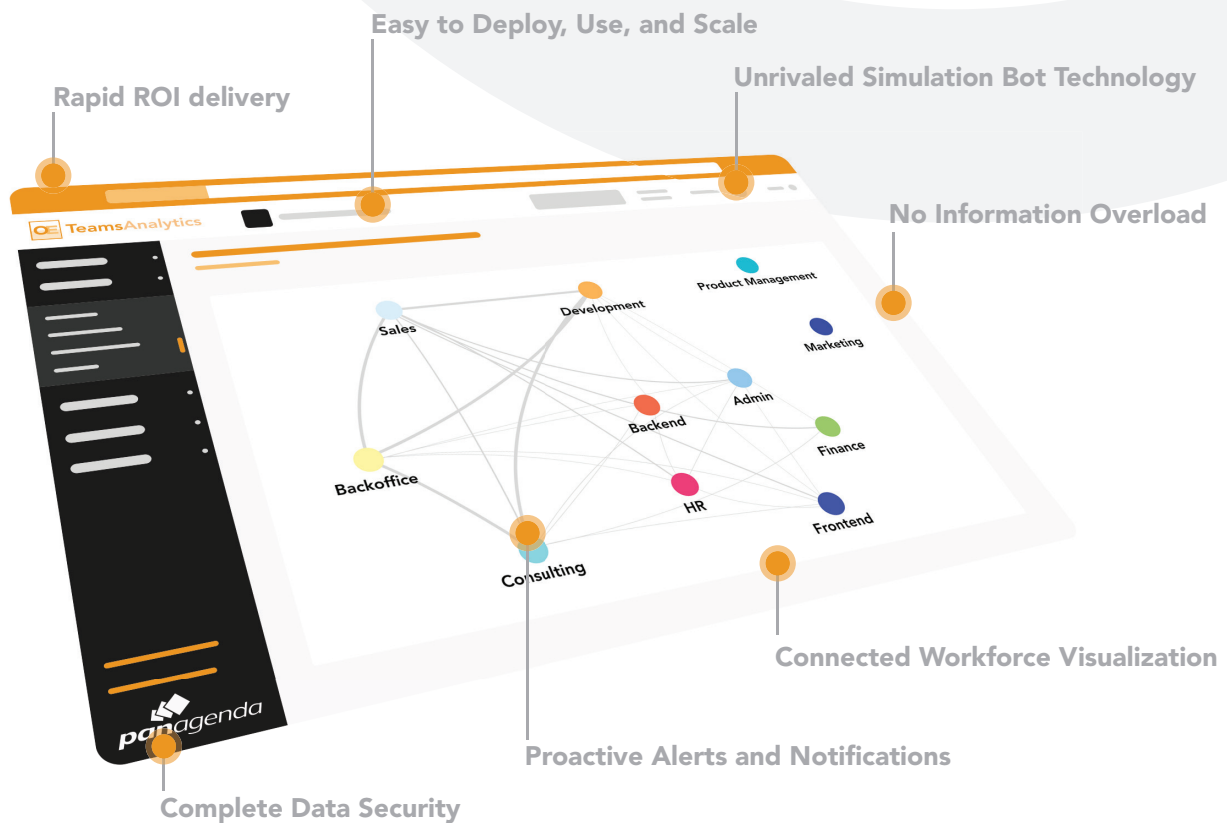

A main IT department duty is to ensure that Office 365 runs continuously at peak performance. Nothing's worse than getting a call at 3am that Office 365 is down.

Once an outage happens, the clock starts ticking. It won't be long before customers start to call. The longer it takes to resolve, the more it costs in staff time, lost productivity, and end-user satisfaction.

The solution is OfficeExpert's system-wide performance monitoring that provides early warning before a failure affects your business. Solve performance issues before your customers know they exist. Stop the clock before calls begin.

MAKE YOUR EMPLOYEES THE COMPETITIVE DIFFERENCE.

TEAMS ANALYTICS FUNCTIONALITY

Quickly Bring Innovative Ideas to Life

Staying ahead of the competition creates constant pressure to innovate. That's why organizations deploy Microsoft Teams. When employees collaborate, they can more easily innovate.

Achieve higher degrees of cross-functional team engagement and productivity at every level of your organization. OfficeExpert's vertical and horizontal engagement visualization shows how information flows through your Teams' neural network. Understanding how you collaborate gives you the ability to improve how you innovate and stay ahead of the competition.

Get more done, not just more data.

OfficeExpert is a modular solution that significantly improves productivity using unrivaled Office 365 performance management and analysis technology.

Innovate smarter with actionable insights into your data to make even better decisions with confidence.

So, don't hesitate. Contact us today, and let's get your next project started!
